SWX - Pool Pumps

Product Catalogue

SWX Discover the New Generation of POOL PUMPS

**Reliable performance,
Uncompromising comfort**

Your pool deserves only the best!

EBARA presents the new line of self-priming pumps designed to guarantee **maximum efficiency**, **durability** and **ease of maintenance**, even in the most demanding conditions.

A real smart investment

~ LOW PRICE, HIGH VALUE

Thanks to the careful design and the optimized production, **EBARA** offers a high-performance product at a surprisingly competitive price. That is ideal for those seeking the right balance between quality and affordability.

~ COMPACT AND ROBUST DESIGN

Compact size, reinforced pump body and materials resistant to pool chemicals. Compatible with saltwater up to 6 g/l of salt.

~ QUITE OPERATION

Designed for continuous and silent use, even in residential settings.

***Best choice for industry professionals
and demanding enthusiasts!***

Reliability, performance and simplicity: ALL in ONE pump

Excellent hydraulic performance

Thanks to a wide range of flow rate and heads, the pumps range is perfectly suited to pools of various sizes and configurations. The operating curves are optimized to ensure maximum energy efficiency.

Oversized basket filter

One of the range's greatest strengths: the extra-large filter basket, capable of retaining a greater amount of debris and impurities. The new design makes it easier to remove and clean the pump, reducing maintenance time.

Simple, fast and safe maintenance

A transparent, quick-release cover makes filter access easy: instant visual inspection and tools-free cleaning operations.

Valuable materials

Built with high-quality components and tested to the most severe standards, **EBARA** pumps ensure long life and consistent operation even under intensive use.

Motors available in single-phase and three-phase versions

To meet every installation requirement, it's possible to choose between asynchronous, single-phase electric motors with IE2 energy efficiency, or three-phase electric motors with IE3 efficiency.
